

- S-1 In country setting, how to use this feature called “Save picture into item file maintenance”?

Version 9.1 and after – Maxx

The screenshot shows a settings window with the following options:

- xxxx/xxx
- xxxxxxxx
- Date System**
 - American
 - China / Japan
 - British
 - Taiwan
- With Per Item Tax
- With GST discount
- Two Decimal Places Required
- Add Transaction With Tax %
- With Unit Cost Price Only (Stock Card)
- Voucher Sequence follow Batch No.
- Post cust. name as desp. in sales ledger
- Save picture into item file maintenance

Screen Picture: [Text Field] [Dropdown Arrow]

Answers

When your item picture file is too big then you can put in other directory like D drive so save your C drive and stock control data directory space then you should un-tick this feature. If un-tick this feature then do a backup and restore in other pc so Item File Maintenance cannot view the item photos. Otherwise, you save item photos into stock control data directory.

For Example:

Step 1: Go to country setting, tick Save picture into item file maintenance.

Step 2: Go to *Maintenance > Item Maintenance > Item File Maintenance* > add an item called A01 then load any picture from D drive then do a backup.

Step 3: Go to other pc, do a restore then you can view the item photo in Item File Maintenance.

- S-2 In country setting, how to use this feature called “Screen Picture”?

Version 9.1 and after – Maxx
